

Postdoctoral Position in Neuroscience

Molecular Physiology of the Synapse Laboratory

Institute of Biomedicine of Seville
(IBiS, HUVR/CSIC/Universidad de Sevilla)
and CIBERNED
Seville (Spain)

Applicants should hold a Ph.D in disciplines related to Neuroscience or Life Sciences. They will be involved in multidisciplinary research related to synaptic and membrane trafficking mechanisms associated with neurological and neurodegenerative disorders studied in genetically modified mice. Experience in amperometry or electrophysiology in single cells or brain slices and/or cell imaging techniques to monitor biological processes and/or cellular and molecular biology and/or optical and electron microscopy. Certificated training in animal experimentation is not mandatory to apply but will be valued. One year contract.

Candidates should email CV and contact information for 3 references to Dr. Rafael Fernández-Chacón (sinapsis-ibis@us.es). Email subject: Postdoct-MPS-10-2021.
Deadline: November 15th, 2021.
