The Institute of Biomedicine of Seville (IBiS) – hereinafter referred as IBIS – is constituted as a research institute as foreseen in the Royal Decree 339/2004, of 27th of February, being participated by the Andalusian Regional Ministry for Innovation, Science and Enterprise, the Andalusian Regional Ministry of Health, the Spanish National Research Council, the University of Seville and the Andalusian Health Service, having these entities a common interest in fostering collaboration and cooperation and in joining efforts in the field of health research.

IBIS is a multidisciplinary biomedical research centre, located in the campus of the Hospital Virgen del Rocio – hereinafter referred as HUVR – with the aim to undertake high quality and competitive research at international level on the most prevalent diseases and the development of new methods of diagnosis and treatment.

The Fundación Pública Andaluza para la Gestión de la Investigación en Salud de Sevilla – hereinafter referred as FISEVI – is the managing body appointed by the Executive Council of IBIS. FISEVI is a non-profit organization belonging to the Public Sector of the Autonomous Community of Andalusia which asset is addressed to training activities, scientific research and technological development in Health related Sciences.

FISEVI aims at the promotion of high-level biomedical research in Andalusia, as well as the development of innovations in health related technologies, training and management of health research. According to the Article 5 of its Statutes, FISEVI is allowed to undertake as many activities directly or indirectly addressed to the consequence of its aims.

As such, FISEVI, in the name of IBIS and with the financial support from the European program CE-PROPAG-AGEING 2014, publishes the present job offer.
